STUDY NOTES · BASIC CONCEPT

What is a Jihadi Drug? Why is it named so?

Defence & Security

26 May 2017

In a significant crackdown on the growing menace of narcotics, law enforcement agencies in Dehradun have once again seized a large consignment of the notorious 'jihadi' drug, commonly known as Captagon. The operation led to the arrest of two individuals, including a Syrian national, raising serious concerns about international drug trafficking networks operating within Indian borders.

Captagon, a powerful amphetamine-type stimulant, has earned the nickname 'jihadi drug' due to its widespread use among extremist fighters in conflict zones across the Middle East. The drug is known to suppress fear, reduce pain sensitivity, and induce heightened alertness, making it a dangerous substance both on and off the battlefield. Authorities have expressed deep concern over the increasing frequency of such seizures in the Uttarakhand region, suggesting the presence of an organized supply chain that extends beyond national boundaries. The involvement of a foreign national in this case has prompted intelligence agencies to investigate possible cross-border connections and the extent of the distribution network within India.

Key Highlights of the Operation

- **Location of Seizure:** The drug bust took place in Dehradun, the capital city of Uttarakhand, which has recently emerged as a hotspot for narcotic-related activities.

- **Arrests Made:** Two individuals were apprehended during the operation, one of whom is a Syrian national, indicating the international dimensions of this drug trafficking ring.

- **Drug Seized:** A substantial quantity of Captagon, widely referred to as the 'jihadi drug,' was recovered during the raid conducted by local police in coordination with intelligence agencies.

- **Nature of the Drug:** Captagon is a synthetic stimulant that combines amphetamine and theophylline, known to produce extreme euphoria, fearlessness, and prolonged wakefulness, making it highly addictive and

dangerous.

- **International Concern:** The involvement of a Syrian citizen has raised red flags among national security agencies, as Syria has long been identified as a major hub for Captagon production and distribution globally.

- **Repeat Incidents:** This is not the first time such a drug has been seized from the Dehradun region,
