International Relations · GS - II

Examine how unilateral security designations and diplomatic confrontations between states can affect intelligence cooperation, bilateral relations and regional stability.

EXAM YEAR	PAPER	SUBJECT
DAILY PRACTICE 01/11/2026	GS - II	International Relations

MARKS	WORD LIMIT
10	~150 words

Answer Hint

Diplomatic confrontation; intelligence cooperation; unilateral designations; national security; international law; West Asian stability

Model Answer

Introduction:

States use diplomatic measures and security designations to express opposition to perceived threats. However, such measures can deepen mistrust and complicate cooperation on shared security challenges.

Major implications

- **Bilateral relations:** Hostile designations can trigger reciprocal diplomatic measures and reduce opportunities for dialogue.
- **Intelligence cooperation:** Deteriorating relations may restrict intelligence-sharing on terrorism, organised crime and transnational threats.
- **Regional security:** In volatile regions such as West Asia, diplomatic confrontations can intensify existing rivalries and increase uncertainty.

- **International law:** Unilateral designations must be distinguished from decisions made under international legal frameworks. Their effects depend on the applicable domestic laws and international obligations.
- **Crisis management:** Reduced communication can make it harder to prevent misunderstandings and contain security incidents.

Way Forward

Countries should preserve diplomatic communication channels, clarify the legal basis of restrictive measures and use multilateral forums where appropriate. Confidence-building measures and dialogue can help prevent bilateral disputes from escalating into wider confrontations.

Conclusion

Security designations may communicate political resolve, but their wider consequences can extend beyond the immediate dispute. Maintaining dialogue and predictable legal processes is important for international security and regional stability.
