DAILY PRACTICE 03/11/2026	GS - III	Defence & Security

MARKS	WORD LIMIT
10	~150 words

Answer Hint

Terrorist logistics and financing; inter-state security coordination; intelligence sharing and investigation; financial tracking; evidence-based prosecution; protection of civil liberties and due process

Model Answer

Introduction

Terrorist organisations may depend not only on direct perpetrators but also on support networks that provide shelter, logistics, communication and financial assistance. The reported busting of a suspected Jammu and Kashmir-linked network in Meerut highlights the importance of investigating such enabling structures.

Major Issues

Support networks can facilitate the movement of operatives, conceal their activities and channel funds. When their activities span multiple states, fragmented intelligence and jurisdictional limitations may complicate investigations. Financial transactions, accommodation arrangements and communication links can provide important investigative leads.

Way Forward

Security agencies should strengthen intelligence sharing, conduct coordinated investigations and use lawful financial-tracking mechanisms to identify funding channels. Digital and documentary evidence should be collected and preserved through proper procedures. Coordination between central and state agencies can help connect evidence across jurisdictions.

At the same time, investigations must distinguish verified evidence from allegations. Suspects should receive due process, and prosecutions must meet applicable legal standards. Oversight and accountability can help prevent arbitrary action and protect civil liberties.

Conclusion

Disrupting terrorist support networks requires intelligence-led investigation, inter-state coordination and financial scrutiny, combined with lawful procedures and evidence-based prosecution.
